**SECTION 1: Identification of the substance/mixture and of the company/undertaking****1.1 Product identifier****Trade name:** QUARTZ SAND MIX 0,06-0,18 mm**CAS Number:**

14808-60-7

**EC number:**

238-878-4

**Registration number:** The product is exempted from REACH Regulation 1907/2006/EC.**1.2 Relevant identified uses of the substance or mixture and uses advised against**

No further relevant information available.

**Application of the substance / the mixture:**

Basic Uses (incomplete list): Glass, production silicates, abrasives, foundry sand, fillers, coatings, adhesives and mortars, filtration, sports and recreation constructions, special constructions, additives in animal feed production, etc.

Uses advised against: blasting material containing more than 1% silica may be permitted if used outdoors outdoors or in hermetically sealed areas where they have taken additional security measures for the protection of workers. Special permission may be required by the competent authority.

**3.1 Substances****CAS No. Description**14808-60-7 Quartz (SiO<sub>2</sub>)**Identification number(s)****EC number:** 238-878-4**Additional information:**

This product contains less than 1% respirable quartz and therefore are not classified as harmful to health.

**SECTION 4: First aid measures****4.1 Description of first aid measures****General information:**

Take affected persons out into the fresh air.

In all cases call a doctor

**After inhalation:**

If breathing is difficult, remove to fresh air. Restore breathing. Keep warm and quiet. Notify physician.

In case of unconsciousness place patient stably in side position for transportation.

Seek medical treatment in case of complaints.

**After skin contact:**

Wash the skin immediately with soap and water.

In case of skin irritation, consult a physician.

**After eye contact:**

Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids.

Check for and remove any contact lenses.

Continue to rinse for at least 15 minutes.

Get medical attention if irritation occurs.

Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor.

**After swallowing:**

Drink plenty of water and provide fresh air. Call for a doctor immediately.

Seek immediate medical advice.

Never give anything by mouth to an unconscious person.

**4.2 Most important symptoms and effects, both acute and delayed**

No further relevant information available.

**4.3 Indication of any immediate medical attention and special treatment needed**

No further relevant information available.

**SECTION 5: Firefighting measures****5.1 Extinguishing media****Suitable extinguishing agents:** CO<sub>2</sub>, powder or water spray. Fight larger fires with water spray.**5.2 Special hazards arising from the substance or mixture** No further relevant information available.**5.3 Advice for firefighters****Protective equipment:**

During fire-fighting wear suitable respiratory device and protective clothes.

Cool closed containers exposed to fire by spraying water.

**Additional information**

Collect contaminated fire fighting water separately. It must not enter the sewage system.

### SECTION 6: Accidental release measures

#### 6.1 Personal precautions, protective equipment and emergency procedures:

Wear protective equipment. Keep unprotected persons away.

Prevent the formation of dust

Avoid inhalation of dust.

Avoid contact with skin and eyes.

Ensure adequate ventilation.

Information on protection measures, see Sections 7 and 8.

**6.1.1 For non-emergency personnel** Avoid contact with dripping or leaking material

**6.1.2 For emergency responders**

First-aid responders must wear protective clothing, gloves, goggles and respiratory device with filter type A.

**6.2 Environmental precautions:** No special measures required.

**6.3 Methods and material for containment and cleaning up:**

Pick up mechanically.

Dispose contaminated material as waste according to item 13.

**6.4 Reference to other sections:**

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

### SECTION 7: Handling and storage

#### 7.1 Precautions for safe handling

Do not breathe dust. Do not ingest.

Avoid contact with skin and eyes.

Prevent formation of dust.

Ensure good ventilation.

Do not eat, drink or smoke during the usage of the product.

Wash hands before each break and after finishing work.

**Information about fire - and explosion protection:** No special measures required.

**7.2 Conditions for safe storage, including any incompatibilities**

**Storage:** Store in cool, dry conditions in well sealed receptacles.

**Requirements to be met by storerooms and receptacles:** Store in a cool location.

**Information about storage in one common storage facility:** Not required.

**Further information about storage conditions:** Keep away from children

**7.3 Specific end use(s)** No further relevant information available.

### Individual protection measures, such as personal protective equipment

#### General protective and hygienic measures:

The usual precautionary measures are to be adhered to when handling chemicals.

Keep away from foodstuffs, beverages and feed.

Wash hands before breaks and at the end of work.

Avoid contact with skin and eyes.

Avoid inhalation of dust.

Do not eat, drink or smoke while using the product.

#### Respiratory protection:

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.

#### Hand protection

Protective gloves resistant to chemicals (standard EN 374-1)

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

#### Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a mixture of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

#### Penetration time of glove material

The determined penetration times according to EN 16523-1:2015 are not performed under practical conditions. Therefore a maximum wearing time, which corresponds to 50% of the penetration time, is recommended.

#### Eye/face protection

For processing and packaging use safety goggles

#### Body protection:

Protective work clothing

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

**Recommended restriction of use**

Prolonged and / or massive exposure to dust containing respirable crystalline silica can cause silicosis, a nodular pulmonary fibrosis caused by pulmonary deposition of very small particles of respirable crystalline silica.

In June 2003, the SCOEL (the EU Scientific Committee on Occupational Exposure Limits) concluded that the main effect in humans of the inhalation of crystalline silica dust is silicosis. "There is sufficient information to conclude that relative is increased the relative risk of causing lung cancer in persons with silicosis (and apparently, not in employees who do not suffer from silicosis who are exposed to silica dust in quarries and in the ceramic industry). Therefore preventing silicosis and decreases the risk of cancer"(SCOEL SUM Doc 94-final, June 2003).

The agreement, following social dialogue of all stakeholders on the protection of workers through the proper management and use of crystalline silica and products containing it was signed on 25 April 2006. This autonomous agreement, the European Commission received financial support from the European Commission, based on a Good Practice Guide. The requirements of the Agreement shall apply from 25 October 2006. The Agreement was published in the Official Journal of the European Union (2006 / C 279/02). The text of the Agreement, its Annexes, including the Good Practice Guide, available at <http://www.nepsi.eu> and provide useful information and guidance for the handling of respirable crystalline silica containing products. The bibliography is available on request in EUROSIL, (European Association of Industrial Production of Crystalline Silicon).
